Full-Stack Developer | MERN Stack | AI Chatbot

Summary

- Motivated web developer and AI enthusiast studying Archaeological Information Systems at Cairo University (graduating 2025). Skilled in full-stack development (MERN Stack) with solid knowledge of AI, machine learning, and chatbots. Experienced in cultural and e-commerce projects with certifications in data science, freelancing, and full-stack development. Passionate about creating intelligent, user-focused web solutions that blend technology with experience.

Education

- Cairo University – Giza, Egypt
  Archaeological Information Systems (A GPA) – June 2025

Skills

- Problem Solving
- Analytical & Critical Thinking
- Teamwork
- Active Listening
- Multitasking
- Object-Oriented Programming
- Chatbot AI

Tools & Technologies

- Web Development
- UI/UX
- Git/GitHub
- HTML/CSS
- TailwindCSS
- JavaScript
- Basics OOP
- SQL / NoSQL
- Mongo
- Node.js
- NestJS
- TypeScript
- Express
- PHP
- Laravel
- React
- RESTful APIs
- Full-Stack Development

Certifications & Training

- Data Science and AI – Dotpy (May 2024)
  Completed a comprehensive course covering the fundamentals and applications of Data Science and Artificial Intelligence. Hands-on training in data analysis, machine learning, and deep learning using Python and tools like Pandas, NumPy, and TensorFlow.

- Back-End Development – Array
  Focused on PHP and MySQL, including Laravel basics, RESTful APIs, CRUD systems, and authentication workflows.

- Full Stack Python Development – ITI (July 2024)
  Completed an intensive one-month course covering Flask/Django, HTML, CSS, JavaScript, and database integration.

- Front-End Development – NTI (June 2025)
  2.5-month training in responsive design, DOM manipulation, and UI/UX best practices using HTML, CSS, and JavaScript.

- Freelancing – ITIDA (June 2025)
  Training in building a freelance career: profile creation, proposal writing, client communication, and time management.

Languages

- Arabic – Native Speaker
- English – Very Good

Projects

- Book Store Management System (November 2025)
  Technologies: React, Node.js, Express, MongoDB
  Developed a full-stack web application for managing a digital bookstore, enabling users to browse, add, edit, and delete books. Implemented RESTful APIs, authentication, and responsive design for seamless user experience and efficient data handling.

- Database System Center – Imhotep Museum, Saqqara (May 2025)
  Technologies: HTML, CSS, TailwindCSS, JavaScript, React, PHP, MySQL, Laravel
  Built a full-stack web database system for the Imhotep Museum to manage and present archaeological data.

- Spotify Clone (June 2025)
  Technologies: React, TailwindCSS
  Created a responsive music streaming app with playback controls, playlist management, and smooth UI transitions.
  Link: https://spotify-clone-vrx5.vercel.app/

- Real-Time Chat Application (February 2025)
  Technologies: React, Node.js, Express, Socket.io, MongoDB
  Developed a live chat platform with one-to-one and group messaging, real-time updates, and authentication.
